V-Chain Solutions held its first nationwide meeting with its Board of Directors, key management and companies supporting the development of the World's First Global Visibility Network. The team came together on December 5, 2006 in order to fine tune the vision and to have a chance to meet key management personnel from various states. V-Chain welcomed its newest board of advisors; Russell Crosby, Connie Marts, Daryll Bowen and Natalie Zeituny:

**Russell Crosby** is a retired CEO whom will be offering his services to the President, James Vinson, to guide him on the strategic direction of the company.

**Connie Mart** is a CFO consultant whom will be offering her services to build and manage V-Chain's accounting practices.

**Daryll Bowen** is the president of a radio frequency identification (RFID) consulting firm and will be using his knowledge and connections to build new strategic relationships for V-Chain Solutions.

**Natalie Zeituny** is the president of NZ Consulting and is a V-Chain business partner. She will be using her firm to primarily engage customers for business transformation consulting and system implementations. NZ Consulting will be the primary consulting arm for V-Chain Solutions' commercial markets.

The V-Chain Solutions team has a combined knowledge of over 400 years of experience in the areas of Supply Chain Management, System Implementation, Radio Frequency Identification Technologies and Business Transformation Consulting. The meeting also focused on current financial status, future financing, and development updates. V-Chain predicts the first module called the V-Chain Engine to be completed by fourth quarter of 2007. The president of V-Chain Solutions stated that we have an unprecedented team assembled to produce a global vision for the future.
